

Known as NO-SEE-UMS screen, this fiberglass screen is a tightly woven 20×20 mesh designed to keep out most smaller flying insects like no-see-ums, gnats, sand flies, and other bugs that may inhabit marshy or coastal areas

PHIFER
INCORPORATED

A 20 x 20 mesh screen has 20 rectangles per inch horizontally and 20 rectangles stacked vertically to make up an inch. The mesh size refers to the density of the screen mesh, which is measured by the number of openings per square inch.

CRAFTING ALUMINUM SOLUTIONS WITH PRECISION AND PASSION SINCE 1977

- .013" Yarn Diameter
- .016 Fabric Thickness (Inch)
- 45% Openness
